About me:

I'm an eighth-year software engineering student at Jeddah University. I'm a self-motivated, detail-oriented professional with a strong expertise in programming languages and development processes. As an entry-level software engineer, I am eager to put my academic knowledge and practical project experience to work in a dynamic and collaborative team.

Education History

Bachelor of Software Engineering
Institution: Jeddah University
Year of Graduation:2024

Project

Fitness App
Developer
November,2022-December,2022

- Created a smartphone app for recording exercise and nutrition data, which allows users to establish goals and measure their progress.
- We scoped out features, created initial wireframes, and designed the product roadmap for a smartphone app that allows users to track their fitness and health journey.

Airplane app
Developer
January,2023-Febuary,2023

- Led a team in designing, building, and testing a remote-controlled airplane model from scratch.
- The project encompassed various phases, including conceptual design, structural analysis, aerodynamic testing, and the integration of electronic control systems.
